NEW PRELAK COLOURS MORE THAN JUST A PRIMER

We have added three new colours to our existing PreLak colour range

PRELAK DARK COCO | NEW

A dark, rich shade with warm undertones. Dilute with PreLak Clear for light and medium brown tones – a versatile colour primer with many options.

PRELAK NORDIC | NEW

Adds a pale wash of colour to light coloured timber, enhancing the attractive grain pattern of the wood for a natural look.

PRELAK DRIFTWOOD GREY | NEW

The perfect grey shade for lighter timber species, including pine. The subtle grey tone is transparent to allow the grain pattern to show through.

One coat gives a hint of colour whereas two or more coats give a more intense grey appearance.

PRELAK WHITE

Our original PreLak Colour retains its soft white colour but the new formula means faster drying and side bonding.

White wooden floors are always in demand – PreLak White offers an easy way to achieve the perfect shade.
